Market News

Thursday, 09 April 2026

North America

- **US equities rallied yesterday (S&P 500 +2.5%, Dow Jones +2.9%, Nasdaq +2.8%)** as a two-week ceasefire agreement between the US and Iran led to a sharp retreat in oil prices and a meaningful improvement in equity sentiment. Only energy lagged, down 3.7%, while industrials led the gains, up +3.8%, and communication services rose +3.4%.
- **US and Iran will soon hold talks in Islamabad for a more permanent end to the war,** a more conciliatory shift from prior rhetoric. But the situation is delicate, as Israeli strikes in Lebanon draw Iran's condemnation and threats to abandon the deal.
- **Meta (+6.5%)** launched its Muse Spark AI model, led by Chief AI Scientist Yann LeCun, aiming to regain momentum after mixed reception to recent Llama releases. Meta also plans to offer Muse Spark to third-party developers via an API.
- **Delta (+3.8%)** expects over $2bn in higher fuel costs through June due to the Iran war, prompting CEO to pursue more fare hikes and ~3.5% capacity cuts. Despite this, it posted adjusted EPS of $0.64 and revenue of $14.2bn, beating expectations.
- **Disney (+3.6%)** plans to cut 1,000 jobs, mainly in its consolidated marketing unit, to offset slimmer streaming profits and fund digital bets. It has already laid off 8,000+ since 2022, mirroring industry cuts at **Sony Pictures** and **Warner Bros (+0.7%).**
- **OpenAI's** CFO said some IPO shares will be reserved for retail investors, though no timeline was given, adding that an $852bn firm should act like a public company. CRO said enterprise is 40% of revenue and on track to match consumer by end-2026.
- **PIMCO** will sell part of the debt for **Oracle's (+0.3%)** $16.3bn Michigan data-center, funded ~15% equity/~85% bonds. The bonds mature in 19.5 years, have a 14-year WAL, and are slated to yield just over +100 bps versus Oracle's outstanding debt.

Europe

- **Trump vented frustration with NATO in a private meeting with Secretary-General Rutte** amid a crisis over the Iran war. Rutte said the White House talk was "very frank" yet between "two good friends," adding he sees Trump's point about allies.
- **EU economy chief Dombrovskis warned the bloc faces a "stagflationary shock"** with low growth and rising inflation, despite the US-Iran two-week ceasefire. The Commission will cut this year's growth forecast amid persistent uncertainty.
- **France will stick to its 5% 2026 deficit goal for now,** Budget Minister told the Senate finance committee. He said 2025's deficit narrowed to 5.1% from 5.8% partly due to one-offs, and uncertainty from the Iran conflict clouds 2026 prospects.

Asia, Emerging Markets & Commodities

- **Asian equities declined this morning (Nikkei -0.7%, Hang Seng -0.7%, CSI 300 -0.6%)** as investors monitored the fragile US-Iran ceasefire, reversing Wednesday's rally driven by the oil price plunge and relief over easing geopolitical tensions.
- **Israel's heaviest strikes in Lebanon killed hundreds,** spurring Iran to threaten retaliation and call US talks "unreasonable." Qalibaf warned after Trump's ceasefire, with clashing agendas and doubts the two-week truce lasts to Saturday's talks.

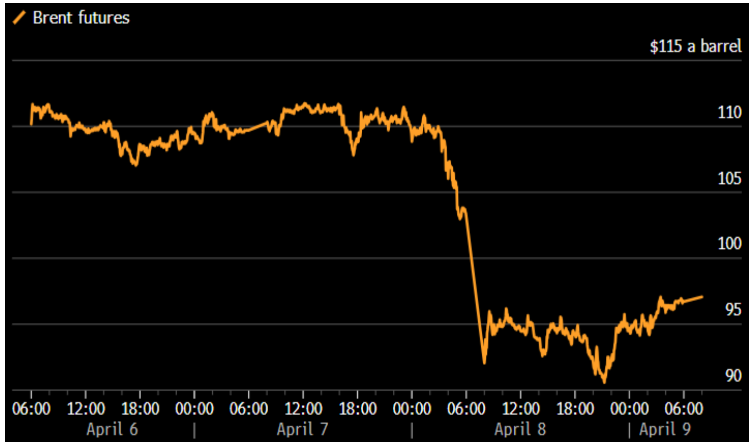
Oil Rebounds as Hormuz Remains Blocked for Now



Source: Bloomberg Finance L.P.

Past performance is not a guide for current or futures results. Any forecast, projection or target, where provided, is indicative only and is not guaranteed in any way.

Sector Update – Energy

Ceasefire provides an important first step of de-escalation

Not yet enough for the oil & gas wells to restart

Key Developments: first step of de-escalation

- Yesterday Iran and the United States agreed to a 2-week ceasefire. Israel also agreed to pause fighting, although this did not extend to Lebanon. American and Iranian delegates are to meet in Pakistan on Saturday to negotiate a conclusive agreement.
- There was little immediate change in traffic around the strait on Wednesday and several Gulf countries are still reporting drone attacks and fires at energy infrastructures post ceasefire announcement (Kuwait, Iran, UAE). Saudi Arabia's East-West oil pipeline, which reroutes crude (7mb/d) from the Gulf to the Red Sea has been attacked.

Implications: terms and traffic restoration remain unclear

- Oil futures fell about 15% to roughly $95 per barrel, though prices remain about 40% higher than at end-February, before the war began. Equity markets rallied, excluding Energy sector (-3.4%) , despite doubts about the durability of the truce and longer-term questions around control of the Strait of Hormuz and Iran's nuclear ambitions.
- Markets will now focus on whether vessels begin clearing the strait, with 700 -1000 ships reportedly stranded, and on how quickly offline capacity returns, with 10 -13 mb/d of crude and products currently shut and further 5mb/d going into storage.
- More importantly, the count of ships entering the Gulf will signal tanker owners' and crews' willingness and ability to operate in a conflict-adjacent zone (including the availability and cost of insurance) and inform producers' timelines for restoring output. With Gulf storage near capacity, inventories must be drawn and loaded before production ramps.

Our View: higher geopolitical premium for oil & products

- Given the scale of logistical disruption and the short, 2-week ceasefire window, it is too early to expect the full return of traffic & volumes through Strait of Hormuz and a restart of the shut-in Persian Gulf production yet.
- **We expect oil prices to remain elevated for longer** due to continued risk premia, constrained and controlled flows, elevated shipping and insurance costs, rerouting, physical infrastructure damage, and restart lags; impaired capacity from prolonged curtailments; and the need to restock strategic and commercial inventories amid hoarding for energy security.
- **Additional escalation risks (including Houthi involvement), upcoming peak seasonal demand, limited substitutability across fuels, ex-Middle East disruptions** (damage to Russian export infrastructure & diesel export bans), and a largely **exhausted oversupply buffer** all argue for caution for now. Longer term, a reordering of oil markets is possible if Iran's role in controlling this transit corridor is permanently retained, potentially reducing OPEC and Saudi Arabia leverage. **We maintain our 2026 Brent average target at $100/bbl for now.**

*" **Subject to the Islamic Republic of Iran agreeing to the COMPLETE, IMMEDIATE, and SAFE OPENING of the Strait of Hormuz**, I agree to suspend the bombing and attack of Iran for a period of two weeks"*

US President Donald Trump

*"For a period of two weeks, safe passage through the Strait of Hormuz will be possible **via coordination with Iran's armed forces** and with due consideration of **technical limitations**"*

Iranian Foreign Minister Abbas Araghchi

Monthly Report – UBP Advisory Certificate

UBP Asia Technology Certificate

Significant Risk

1 2 3 4 5

PRODUCT RISK CLASSIFICATION

- The **UBP Asia Technology Certificate was -11.3% in March 2026**, outperforming its benchmark (MSCI Asia -13.0%) but underperforming global equities (MSCI World -7.2%) and global tech stocks (NASDAQ -4.9%). The year-to-date performance of the certificate as of March is -6.7%.
- **US war on Iran hurt Asian growth markets disproportionately.** Geopolitical headlines dominated trading in March with stock- and market-specific fundamental drivers taking a backseat. The prospect of higher global inflation and slower economic growth drained investment funds away from Asia and emerging markets toward safer havens like the US, as well as into utilities and energy sectors. South Korea was the worst-performing market at -24.8% in March, followed by Japan (-13.1%) and Taiwan (-13.0%). China (-7.7%) market was less impacted due to energy security, policy predictability and relative economic stability.
- **Positive takeaways from China tech earnings season.** AI adoption continued to grow strongly with token consumption rising at a breakneck pace for cloud and foundation model operators. The government's "anti-involution" drive is supporting an earnings rebound in food delivery, e-commerce and EVs, partially offset by higher AI investment. Post-1Q earnings revisions, consensus now forecasts +11% EPS growth for the China tech sector in 2026.
- **Structural AI growth unaffected by war.** Asian AI supply chain stocks including Samsung and TSMC have continued to report strong growth and record-high profits. Order visibility is high into 2027 and unlikely to be derailed even in a scenario of prolonged Middle East tensions.

March 2026

Monthly Report – UBP Advisory Certificate

UBP Defence Certificate

Significant Risk

1 2 3 4 5

PRODUCT RISK CLASSIFICATION

- **Performance recap:** Global equities declined in March (MSCI ACWI total return -7.2%) as markets adopted a risk-off mood amid escalating geopolitical tensions and significant disruptions to global oil flows. The certificate also registered losses during the month (-10.7% in USD, -7.8% in EUR), underperforming global equities but outperforming comparable ETFs.
- **Conflict in the Middle East under the spotlight:** On February 28, the US and Israel launched an attack on Iran, triggering a regional conflict as Iran fired back at Israel and neighbouring US-allied states in the Gulf. Despite the conflict lasting the full month of March which should have acted as a support for the defence sector, it surprisingly underperformed global equities for three main reasons: 1) investors took profits after a strong rally over Jan.-Feb.; 2) higher crude prices lifted interest rates, weighing on asset-heavy companies valued on future cash flows such as defence contractors; and 3) commercial aerospace exposed companies fell on heavily disrupted air traffic. In addition to geopolitical tensions, sector performance remains tied to US and international national security spending. On April 3rd, the White House announced that it is seeking $1.5tn for defence spending as part of a fiscal 2027 budget request, increasing by more than 40% compared to last year.
- **Our thoughts:** The US-Iran war has drawn down US and allied missile and munition stockpiles, including interceptors, requiring both replenishment and expansion. In the first 16 days of the conflict, the US, together with coalition forces, burned through more than 11,200 munitions at an estimated cost of $26bn, among these were more than 1,200 RTX Patriot missile-defence systems. The US Department of Defence has already prioritized this, with new framework agreements in place, but scaling production will take time. Beyond near-term resupply, governments are reassessing how modern warfare is fought and will need to upgrade infrastructure and equipment accordingly. For example, the drone market is entering a hyper-growth phase, projected to reach $250 billion by 2035 after doubling from about $20 billion in 2020 to roughly $40 billion in 2025.

Definition of the Product Risk Classification (PRC)

- **PRC 1 (Low Risk)**: Instruments with low fluctuations in value, good creditworthiness and liquidity on normal markets. Examples include most money market investments and specific government bonds.
- **PRC 2 (Moderate Risk)**: Instruments with good creditworthiness and moderate risks overall on normal markets. Examples include bond funds, bonds or portfolio funds with large proportions of high quality bonds.
- **PRC 3 (Medium Risk)**: Instruments with single-digit to low double-digit fluctuations in value, robust creditworthiness and good liquidity on normal markets. Examples include high-quality blue-chip equities, broadly diversified equity funds or portfolio funds.
- **PRC 4 (Significant Risk)**: Instruments with increased potential fluctuations in value of double-digit percentage or below-average creditworthiness. Example include cyclical equities or high-quality equities from emerging markets, bonds with high coupon rates (junk bonds) or alternatives investments such as certain commodities.
- **PRC 5 (High Risk)**: Instruments with high potential fluctuations in value of double-digit percentage and high overall risks owing to poor creditworthiness or liquidity. Examples include options, equities of smaller companies and equities in volatile markets, selected non-securitized derivative products, and all type of accumulators and decumulators.
- **PRC NR (Not Rated)**: Waiting for a risk rating note.

- Investments in the notes / certificates / warrants shall not be treated as the same as investments in the underlying and you are fully exposed to the default risk of the issuer.
- Investments in the notes / certificates / warrants involve significant risks which should be carefully evaluated before making an investment. Such risks include, but not limited to, Investment Risks, Market Risks, Credit Risks, Foreign Exchange Risks, Hedging Risks, Re-investment Risks, Secondary Market Trading / Liquidity Risks, Event Risks, Risks of early redemption by Issuer at amount less than the amount initially invested, Risks of notes being redeemed by physical delivery of the Shares, Possible conflicts of interest risk, etc.
- The notes / certificates / warrants will not be traded on any regulated markets or listed on any exchange. You should be prepared to hold the notes / certificates / warrants until the maturity date as you may not be able to liquidate some or all of the notes / certificates / warrants as and when required or at an amount equal to or more than the amount initially invested. There can be no assurance that a secondary market for the notes / certificates / warrants will be developed, and there can be no assurance that you will be able to obtain a firm bid price for the notes / certificates / warrants for an amount at which you wish to sell.
- This is a structured product which involves derivatives. Do not invest in it unless you fully understand and are willing to assume the risks associated with it. If you are in any doubt please seek your own independent professional advice.
- You should always refer to the term sheet, offering circular and/or other related product documentation issued and/or provided by the issuer (“Documents”) for further details. In case of discrepancies, the Documents should prevail. Where there is a Chinese version of this document, the English version prevails.
- UBP SA will be acting as principal in this transaction.

Disclaimer

This document is a marketing communication containing GENERAL INFORMATION on the financial services and/or financial instruments, and reflecting the sole opinion of Union Bancaire Privée, UBP SA and/or any entity of the UBP Group (hereinafter "UBP") as of the date of issue. It may contain generic recommendations but it is not and should not be deemed an offer nor a solicitation to enter into any transaction with UBP, buy, subscribe to, or sell any currency, product, or financial instrument, make any investment, or participate in any particular trading strategy in any jurisdiction where such an offer or solicitation would not be authorised, or to any person to whom it would be unlawful to make such an offer or solicitation. This document is meant only to provide a broad overview for discussion purposes, in order to determine clients' interest. It does not replace a prospectus, KID, KIID or any other legal document relating to any specific financial instrument, which may be obtained upon request free of charge from UBP or from the registered office of the issuer of the instrument concerned, where applicable. The opinions herein do not take into account individual clients' circumstances, objectives, or needs. In this document UBP makes no representation as to the suitability or appropriateness, for any particular client, of the financial instruments or services described, nor as to their future performances. Clients who wish to obtain more information about any specific financial instruments can request it from UBP and/or their Relationship Manager. Where an investment is considered, the information on the risks linked to each financial instrument shall be provided in good time by separate means before the investment decision is taken. In any case, each client must make their own independent decisions regarding any securities or financial instruments mentioned herein and regarding the merits or suitability of any investment. Before entering into any transaction, clients are invited to carefully read the risk warnings and the regulations set out in the prospectus or other legal documents and are urged to seek independent, professional advice from their financial, legal, accounting and/or tax advisors with regard to their investment objectives, financial situation and specific needs.

UBP performs analysis on the financial instruments based on market offer and may maintain and/or seek to develop business affiliations with third parties for that purpose; furthermore UBP may create its own financial instruments. This generic information is therefore not independent from the proprietary interests of UBP or connected parties, which may conflict with the client's interests. UBP has policies governing cases of conflicts of interest and takes appropriate organisational measures to prevent potential conflicts of interest. The information contained in this document is not the result of financial analysis within the meaning of the Swiss Banking Association's "Directives on the Independence of Financial Research" or of independent investment research as per the EU's MiFID or other regulations. EU regulation does not govern relationships entered into with UBP entities located outside the EU. The investments mentioned herein may be subject to risks that are difficult to quantify and to integrate into the valuation of investments. Generally speaking, products with a high degree of risk, such as derivatives, structured products or alternative/nontraditional investments (such as hedge funds, private equity, real estate funds, etc.) are suitable only for clients who are capable of understanding and assuming the risks involved. The value of any capital investment may be at risk and some or all of the original capital may be lost. The investments are exposed to currency fluctuations and may increase or decrease in value. Fluctuations in exchange rates may cause increases or decreases in the client's returns and/or in the value of the portfolio. The client may be exposed to currency risks if a financial instrument or the underlying investment of a financial instrument is denominated in a currency different from the reference currency of the client's portfolio or from the currency of their country of residence. For more information on risks, the brochure called "Characteristics and risks of certain financial operations" should be consulted. When providing investment advice or portfolio management services, UBP considers and assesses all relevant financial risks, including sustainability risks. Sustainability risks are defined by the EU's Sustainable Finance Disclosure Regulation (2019/2088) as "an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment". For further information on our sustainability risk management approach please visit [www.ubp.com]

Reasonable efforts have been made to ensure that the content of this document is based on objective information and data obtained from reliable sources. However, UBP cannot guarantee that the information the Bank has gathered in good faith is accurate and complete, nor does it accept any liability for any loss or damage resulting from its use. Circumstances may change and affect the data collected and the opinions expressed at the time of publication. Therefore information contained herein is subject to change at any time without prior notice. UBP makes no representations, provides no warranty and gives no undertaking, express or implied, regarding any of the information, projections or opinions contained herein nor does it accept any liability whatsoever for any errors, omissions or misstatements in the document. UBP does not undertake to update this document or to correct any inaccuracies which may have become apparent after its publication. This document may refer to the past performance of financial instruments. Past performance is not a guide to current or future results. The value of financial instruments can fall as well as rise. All statements in this document, other than statements of past performance and historical fact, are "forward-looking statements". Forward-looking statements do not guarantee future performances. The financial projections included in this document do not represent forecasts or budgets, but are purely illustrative examples based on a series of current expectations and assumptions which may not happen as forecast. The actual performance, results, market value and prospects of a financial instrument may differ materially from those expressed or implied by the forwardlooking statements in this document. The projected or targeted returns are inherently subject to significant economic, market and other uncertainties that may adversely affect performance. UBP also disclaims any obligation to update forward-looking statements, as a result of new information, future events or otherwise. Any performance data included in this document does not take into account fees, commissions, expenses charged on issuance and redemption of securities, or any other costs, nor any taxes that may be levied. The tax treatment of any investment depends on the client's individual circumstances and may be subject to change in the future. This document does not contain any tax advice issued by UBP and does not reflect the client's individual circumstances. This document is confidential and is intended to be used only by the person to whom it was delivered. This document may not be reproduced, either in whole or in part. UBP specifically prohibits the redistribution of this document, in whole or in part, without its written permission and accepts no liability whatsoever for the actions of third parties in this respect. This document is not intended for distribution in the US and/or to US Persons or in jurisdictions where its distribution by UBP would be restricted.

Switzerland: UBP is authorised and regulated in Switzerland by the Swiss Financial Market Supervisory Authority (FINMA).
UK: UBP is authorised in the United Kingdom by the Prudential Regulation Authority, and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the Prudential Regulation Authority.
Dubai: This marketing material has been communicated by Union Bancaire Privée (Middle East) Limited, a company regulated by the Dubai Financial Services Authority ("DFSA"). It is intended for professional clients and/or market counterparties only and no other person should act upon it. The financial products or services to which this material relates will only be made available to a client who meets the professional client and/or market counterparty requirements. This information is provided for information purposes only. It is not to be construed as an offer to buy or sell, or a solicitation for an offer to buy or sell any financial instruments, or to participate in any particular trading strategy in any jurisdiction.
Hong Kong: UBP is a licensed bank regulated by the Hong Kong Monetary Authority (HKMA) and a registered institution regulated by the Securities and Futures Commission (SFC) for Type 1, 4 & 9 activities only in Hong Kong. The securities may only be offered or sold in Hong Kong by means of documents that (i) are addressed to "professional investors" within the meaning of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) and any rules made thereunder (the "SFO"); or (ii) are defined as "prospectuses" within the meaning of the Companies Ordinance (Chapter 32 of the Laws of Hong Kong) (the "CO") or constitute offers to the public within the meaning of the CO. Unless permitted to do so under the laws of Hong Kong, no person may issue or have in their possession for the purpose of issuing, whether in Hong Kong or elsewhere, any advertisement, invitation or document
relating to the securities, directed at, or likely to be accessed or read by, the public in Hong Kong, except where the securities are intended to be disposed of only to persons outside Hong Kong, or only to "professional investors" within the meaning of the SFO.
Singapore: UBP is a bank regulated by the Monetary Authority of Singapore (MAS), is an exempt financial adviser under the Financial Advisers Act 2001 of Singapore to provide certain financial advisory services, and is exempt under section 99(1) of the Securities and Futures Act 2001 of Singapore to conduct certain regulated activities. This document has not been registered as a prospectus with the MAS. Accordingly, this document and any other document or material in connection with generic recommendations may not be circulated or distributed, whether directly or indirectly, to persons in Singapore other than (i) institutional investors; or (ii) accredited investors as defined under the Securities and Futures Act 2001 of Singapore. This advertisement has not been reviewed by the Monetary Authority of Singapore.
Luxembourg: UBP is registered by the Luxembourg supervisory authority the Commission de Surveillance du Secteur Financier (CSSF).
