## DISCLAIMER

This document is a marketing communication containing GENERAL INFORMATION on the financial services and/or financial instruments, and reflecting the sole opinion of Union Bancaire Privée, UBP SA and/or any entity of the UBP Group (hereinafter "UBP") as of the date of issue. It may contain generic recommendations but it is not and should not be deemed an offer nor a solicitation to enter into any transaction with UBP, buy, subscribe to, or sell any currency, product, or financial instrument, make any investment, or participate in any particular trading strategy in any jurisdiction where such an offer or solicitation would not be authorised, or to any person to whom it would be unlawful to make such an offer or solicitation. This document is meant only to provide a broad overview for discussion purposes, in order to determine clients' interest. It does not replace a prospectus, KID, KIID or any other legal document relating to any specific financial instrument, which may be obtained upon request free of charge from UBP or from the registered office of the issuer of the instrument concerned, where applicable. The opinions herein do not take into account individual clients' circumstances, objectives, or needs.

In this document UBP makes no representation as to the suitability or appropriateness, for any particular client, of the financial instruments or services described, nor as to their future performances. Clients who wish to obtain more information about any specific financial instruments can request it from UBP and/or their Relationship Manager. Where an investment is considered, the information on the risks linked to each financial instrument shall be provided in good time by separate means before the investment decision is taken. In any case, each client must make their own independent decisions regarding any securities or financial instruments mentioned herein and regarding the merits or suitability of any investment. Before entering into any transaction, clients are invited to carefully read the risk warnings and the regulations set out in the prospectus or other legal documents and are urged to seek independent, professional advice from their financial, legal, accounting and/or tax advisors with regard to their investment objectives, financial situation and specific needs.

UBP performs analysis on the financial instruments based on market offer and may maintain and/or seek to develop business affiliations with third parties for that purpose; furthermore UBP may create its own financial instruments. This generic information is therefore not independent from the proprietary interests of UBP or connected parties, which may conflict with the client's interests. UBP has policies governing cases of conflicts of interest and takes appropriate organisational measures to prevent potential conflicts of interest.

The information contained in this document is not the result of financial analysis within the meaning of the Swiss Banking Association's "Directives on the Independence of Financial Research" or of independent investment research as per the EU's MiFID or other regulations. EU regulation does not govern relationships entered into with UBP entities located outside the EU. The investments mentioned herein may be subject to risks that are difficult to quantify and to integrate into the valuation of investments. Generally speaking, products with a high degree of risk, such as derivatives, structured products or alternative/nontraditional investments (such as hedge funds, private equity, real estate funds, etc.) are suitable only for clients who are capable of understanding and assuming the risks involved. The value of any capital investment may be at risk and some or all of the original capital may be lost. The investments are exposed to currency fluctuations and may increase or decrease in value. Fluctuations in exchange rates may cause increases or decreases in the client's returns and/or in the value of the portfolio. The client may be exposed to currency risks if a financial instrument or the underlying investment of a financial instrument is denominated in a currency different from the reference currency of the client's portfolio or from the currency of their country of residence. For more information on risks, the brochure called "Characteristics and risks of certain financial operations" should be consulted.

When providing investment advice or portfolio management services, UBP considers and assesses all relevant financial risks, including sustainability risks. Sustainability risks are defined by the EU's Sustainable Finance Disclosure Regulation (2019/2088) as "an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment". For further information on our sustainability risk management approach please visit [www.ubp.com].
