## North America

- **US equities closed higher (S&P 500 +0.6%, Dow Jones +0.6%, Nasdaq +0.8%)** as Israeli Prime Minister Netanyahu directed aides to begin direct talks with Lebanon and the US & Iran agreed to hold direct talks starting Saturday, even as strikes in the Middle East continue. Sector-wise, only Energy (-1.2%) and Health Care (-1.2%) declined, while Discretionary led (+2.5%).
- **Chevron (-1.3%)** said Q1 production fell up to 6%, partly due to the Iran war, mirroring Exxon's recent disclosure. Output was 3.8-3.9 million net oil-equivalent barrels per day, down from 4.05 million in Q4 2025, according to a Thursday filing.
- **Scott Bessent and Fed Chair Jerome Powell convened Wall Street leaders over cyber risks from Anthropic's new AI model, Mythos.** Regulators warn it could enable advanced attacks by exploiting vulnerabilities in major systems.
- **OpenAI** told investors its early expansion of computing capacity gives it an edge over **Anthropic** by meeting surging AI demand. It argued Anthropic's CEO underestimated market appetite, framing caution as misjudging how fast demand came.
- **Over \$330bn in software high-yield, loan, and BDC debt matures by 2028.** This is increasing pressure on private credit funds, prompting a pullback from software, while PE exits are stalling, and many investors are leaving direct lending funds.

## Europe

- **Airbus (+0.1%)** ended Q1 with another soft delivery month, underscoring that supply-chain bottlenecks still constrain production. March deliveries rose to 60 planes from February, up from 25 the prior month, but down 15% year over year.
- **UBS (+0.4%)** will withhold privileged documents in the Credit Suisse Nazi-linked accounts probe after a judge refused lawsuit protections, keeping 1990s materials confidential and likely shifting the dispute to the public and political arena.

## Asia, Emerging Markets & Commodities

- **Asian equities rose this morning (Nikkei +1.8%, Hang Seng +0.6%, CSI 300 +1.5%)** as Wall Street gains carried over, while China exited factory deflation after more than three years as PPI rose in March following the oil shock from the Iran war.
- **Israeli PM Benjamin Netanyahu directed aides to begin talks with Lebanon next week.** President Trump said Netanyahu is 'going to low-key it' with strikes on Lebanon, even as Israel said it will continue strikes against Hezbollah in the interim.
- **China's PPI rose 0.5% for the first time in over three years**, while March CPI grew 1.0% YoY, below forecasts as gasoline jumped 11.1%, stoking fears of "bad inflation" that could further squeeze already thin manufacturing margins.
- **TSMC (+2.3%)** posted a 35% jump in quarterly revenue to NT\$1.13tr, beating estimates. March sales are up 45%, signaling resilient AI chip demand amid Middle East tensions and easing concerns about slower spending on AI data centres.
- **Alibaba Cloud (+2.1%)** led a 2 billion yuan investment in ShengShu, maker of the Vidu AI video generator, to push beyond text-based AI toward real-world simulation tech, an area distinct from chatbot foundations and critical for advancing robotics.

## Macroeconomic Calendar

| Event                     | Time  | Period | Actual  | Survey  |
|---------------------------|-------|--------|---------|---------|
| Japan PPI MoM             | 01:50 | Mar    | 0.8%    | 0.7%    |

## S&P 500's Longest Winning Streak Since October

# Equity – New Conviction

Technip Energies Nv (TE FP | PRC: NR)

**OUR INVESTMENT CASE:** Technip Energies is a global energy technology and services company and holds over 35% global liquified natural gas (LNG) market share, confirmed by the landmark North Field awards in Qatar. The company anticipates its highest-ever annual order intake in 2026 across the Middle East and beyond, with several mega-projects expected to reach final investment decision. With a net cash position of ~€1bn, an S&P BBB credit rating, and ~€300m in planned shareholder returns in 2026, the financial profile is robust.

## LNG LEADERSHIP AND REBUILD OPPORTUNITY

- Technip Energies operates through two segments: Project Delivery, which executes large-scale Engineering, Procurement & Construction (EPC) contracts, primarily LNG, petrochemicals, and decarbonization infrastructure; and Technology, Products & Services (TPS), which licenses process technologies and supplies proprietary equipment.
- Technip’s leading position in global LNG market (35% market share)** and its strong track record in executing significant LNG EPC projects in key regions provide both competitive advantage and company specific catalyst. The company is currently working on two material projects in Qatar - North Field East (NFE) and North Field South (NFS) - and was recently awarded the North Field West (NFW) EPC project.
- In March 2026 a missile attacks at Ras Laffan plant in Qatar damaged two LNG Trains** with a combined capacity of 12.8 mtpa, and repairs will take three to five years. Because Technip is involved in all eight NFE, NFS, and NFW trains and has done brownfield work on earlier Qatar trains, including the damaged Train 6, the company is likely to receive repair contracts. As of YE25, about 50% of Technip’s backlog is in the Middle East; the backlog remains intact with no contractual cancellations, though temporary stoppages have caused some operational disruption.
- Balance Sheet Strength and Return Policy:** with a net cash position of ~€1bn, an S&P BBB credit rating, and ~€300m in planned shareholder returns in 2026, the financial profile is robust. Capital allocation policy commits a minimum of 25%-35% of recurring free cash flow to dividends. For 2026, Technip Energies proposed an 18% dividend increase and a €150m share buyback.
- Attractive Valuations:** even after a +26% YTD rise, Technip’s shares have lagged the MSCI Europe Energy index by 10%. We initiate coverage with a Conviction rating and a €48/share target price, based on a 12-month forward EV/EBITDA of 8x, in line with the 5-year average of the peer group.

# Equity Update – Target Price Increased

Taiwan Semiconductor Manufacturing Co (TSM US | PRC: 4)

**OUR INVESTMENT CASE:** TSMC is the most dominant and irreplaceable independent semiconductor foundry globally, with a substantial technology lead over competitors. It is entering a period of high medium-term structural growth driven by 5G, generative AI and high-performance computing megatrends as well as increasing silicon content across automotive and IoT applications. TSMC expects 25% sales CAGR over the next five years (2024-29) and gross margin >56%, underpinned by 55-59% CAGR for AI-chips.

## ROBUST GROWTH SUPPORTED BY STRONG AI DEMAND

- **1Q revenue ahead of guidance.** On 10 Apr, TSMC reported Mar revenue of NT\$415b (+45% yoy; +31% mom). Combined Jan-Mar revenue of NT\$1.13t (+35% yoy) is 2% ahead of 1Q guidance. Profit may exceed consensus driven by better margins as capacity utilization for leading-edge nodes remains high and a portion of expedited orders in 1Q were priced at significant premiums.
- **Full P&L will be reported on 16 Apr**, together with the updated outlook for 2Q and 2026. Given the Middle East conflict and headwinds to consumer demand, TSMC is unlikely to update full year guidance for now (currently at +30% yoy revenue growth) despite a strong 1Q. Consensus is looking for 2Q revenue growth of 5-10% qoq with stable gross margin in 64-65% range, driven by strength in AI accelerators and AI-inference demand for traditional server CPU.
- **Robust 2026 outlook.** TSMC expects +30% yoy revenue growth (in USD). There may be 2-3 ppts GM dilution from 2nm ramp up in 2H26 but overall margin could improve. Capex is expected to reach \$52-56b (+32% yoy).
- **Raise target price to \$420 from \$400.** We value TSMC at 27x forward P/E. The equivalent target price for the local share is ~NT\$2,300 (assuming 16% discount to ADR). Consensus expects 2026 earnings growth of 39% yoy.
- TSMC ADR is +20% ytd and +5% in the past month, underperforming global semis (SOX +23% ytd, +10% past month). TSMC trades at 23.9x forward PE vs the SOX at 20.3x.

# Monthly Report – UBP Advisory Certificate

## UBP Power Demand Certificate (ex Energy Tr)

- The Power Demand certificate was down 3.1% in March vs the MSCI ACWI that was down 7.2% as the ME conflict triggered a broader market sell off to which the certificate proved relatively resilient.
- **Global Electrification (c. 34% weight):** Performance was softer in March with the block down around 2-3%. The Independent power producers (NRG, Constellation Energy, Vistra) were all weak, trading to some extent in sink with the tech sector. Regulated names and integrated names were broadly flat to up slightly in the month due to their defensive characteristics. Mid-stream companies also held up relatively well. European utilities were mixed in the month.
- **Energy Technologies (c. 10% weight)** – We made few changes to this volatile portion of the portfolio other than reducing exposure to Doosan Enerbility. This part of the portfolio was up >1% in the month.
- **Enabling Future Energy (c. 20% weight)** – This part of the portfolio was down c. 4+%. We cut exposure to industrial companies in Korea, Japan since Asia is the most impacted by the energy crisis. We did increase our exposure to Oil Field Service companies.
- **Materials for the Future (c. 35% weight)** – We made major changes in this part of the portfolio as the conflict started. We cut our exposure to the miners from c. 12+% down to 3-4%. We built a c. 10% position in oil and gas companies in Europe as well as positions in US petrochemical and fertiliser names due to them having plentiful cheap domestic energy sources (gas).
- **Outlook:** Volatility in markets looks set to continue as the ME energy crisis evolves, and even upon a peace deal, it will take time to normalise energy flows. An energy crisis only strengthens the case to invest more in power and energy infrastructure around the world. Electrification is a route to reduce reliance on fossil fuels, but also there will be rising activity to diversify fossil fuel resources so spend across the whole power and energy complex is likely to rise in the years ahead. We also believe that the HALO trade remains intact with so much uncertainty around, investors appetite for tangible long-term assets should remain healthy.

### Definition of the Product Risk Classification (PRC)

- **PRC 1 (Low Risk):** Instruments with low fluctuations in value, good creditworthiness and liquidity on normal markets. Examples include most money market investments and specific government bonds.
- **PRC 2 (Moderate Risk):** Instruments with good creditworthiness and moderate risks overall on normal markets. Examples include bond funds, bonds or portfolio funds with large proportions of high quality bonds.
- **PRC 3 (Medium Risk):** Instruments with single-digit to low double-digit fluctuations in value, robust creditworthiness and good liquidity on normal markets. Examples include high-quality blue-chip equities, broadly diversified equity funds or portfolio funds.
- **PRC 4 (Significant Risk):** Instruments with increased potential fluctuations in value of double-digit percentage or below-average creditworthiness. Example include cyclical equities or high-quality equities from emerging markets, bonds with high coupon rates (junk bonds) or alternatives investments such as certain commodities.
- **PRC 5 (High Risk):** Instruments with high potential fluctuations in value of double-digit percentage and high overall risks owing to poor creditworthiness or liquidity. Examples include options, equities of smaller companies and equities in volatile markets, selected non-securitized derivative products, and all type of accumulators and decumulators.
- **PRC NR (Not Rated):** Waiting for a risk rating note.

### Risks disclosures for Structured Products

- This Product is not a protected deposit and is not protected by the Deposit Protection Scheme in Hong Kong or the Deposit Insurance Scheme in Singapore.
- Investments in the notes / certificates / warrants shall not be treated as the same as investments in the underlying and you are fully exposed to the default risk of the issuer.
- Investments in the notes / certificates / warrants involve significant risks which should be carefully evaluated before making an investment. Such risks include, but not limited to, Investment Risks, Market Risks, Credit Risks, Foreign Exchange Risks, Hedging Risks, Re-investment Risks, Secondary Market Trading / Liquidity Risks, Event Risks, Risks of early redemption by Issuer at amount less than the amount initially invested, Risks of notes being redeemed by physical delivery of the Shares, Possible conflicts of interest risk, etc.
- The notes / certificates / warrants will not be traded on any regulated markets or listed on any exchange. You should be prepared to hold the notes / certificates / warrants until the maturity date as you may not be able to liquidate some or all of the notes / certificates / warrants as and when required or at an amount equal to or more than the amount initially invested. There can be no assurance that a secondary market for the notes / certificates / warrants will be developed, and there can be no assurance that you will be able to obtain a firm bid price for the notes / certificates / warrants for an amount at which you wish to sell.
- This is a structured product which involves derivatives. Do not invest in it unless you fully understand and are willing to assume the risks associated with it. If you are in any doubt please seek your own independent professional advice.
- You should always refer to the term sheet, offering circular and/or other related product documentation issued and/or provided by the issuer ("Documents") for further details. In case of discrepancies, the Documents should prevail. Where there is a Chinese version of this document, the English version prevails.
- UBP SA will be acting as principal in this transaction.

## Disclaimer

This document is a marketing communication containing GENERAL INFORMATION on the financial services and/or financial instruments, and reflecting the sole opinion of Union Bancaire Privée, UBP SA and/or any entity of the UBP Group (hereinafter “UBP”) as of the date of issue. It may contain generic recommendations but it is not and should not be deemed an offer nor a solicitation to enter into any transaction with UBP, buy, subscribe to, or sell any currency, product, or financial instrument, make any investment, or participate in any particular trading strategy in any jurisdiction where such an offer or solicitation would not be authorised, or to any person to whom it would be unlawful to make such an offer or solicitation. This document is meant only to provide a broad overview for discussion purposes, in order to determine clients’ interest. It does not replace a prospectus, KID, KIID or any other legal document relating to any specific financial instrument, which may be obtained upon request free of charge from UBP or from the registered office of the issuer of the instrument concerned, where applicable. The opinions herein do not take into account individual clients’ circumstances, objectives, or needs. In this document UBP makes no representation as to the suitability or appropriateness, for any particular client, of the financial instruments or services described, nor as to their future performances. Clients who wish to obtain more information about any specific financial instruments can request it from UBP and/or their Relationship Manager. Where an investment is considered, the information on the risks linked to each financial instrument shall be provided in good time by separate means before the investment decision is taken. In any case, each client must make their own independent decisions regarding any securities or financial instruments mentioned herein and regarding the merits or suitability of any investment. Before entering into any transaction, clients are invited to carefully read the risk warnings and the regulations set out in the prospectus or other legal documents and are urged to seek independent, professional advice from their financial, legal, accounting and/or tax advisors with regard to their investment objectives, financial situation and specific needs.

UBP performs analysis on the financial instruments based on market offer and may maintain and/or seek to develop business affiliations with third parties for that purpose; furthermore UBP may create its own financial instruments. This generic information is therefore not independent from the proprietary interests of UBP or connected parties, which may conflict with the client’s interests. UBP has policies governing cases of conflicts of interest and takes appropriate organisational measures to prevent potential conflicts of interest. The information contained in this document is not the result of financial analysis within the meaning of the Swiss Banking Association’s “Directives on the Independence of Financial Research” or of independent investment research as per the EU’s MiFID or other regulations. EU regulation does not govern relationships entered into with UBP entities located outside the EU. The investments mentioned herein may be subject to risks that are difficult to quantify and to integrate into the valuation of investments. Generally speaking, products with a high degree of risk, such as derivatives, structured products or alternative/nontraditional investments (such as hedge funds, private equity, real estate funds, etc.) are suitable only for clients who are capable of understanding and assuming the risks involved. The value of any capital investment may be at risk and some or all of the original capital may be lost. The investments are exposed to currency fluctuations and may increase or decrease in value. Fluctuations in exchange rates may cause increases or decreases in the client’s returns and/or in the value of the portfolio. The client may be exposed to currency risks if a financial instrument or the underlying investment of a financial instrument is denominated in a currency different from the reference currency of the client’s portfolio or from the currency of their country of residence. For more information on risks, the brochure called “Characteristics and risks of certain financial operations” should be consulted. When providing investment advice or portfolio management services, UBP considers and assesses all relevant financial risks, including sustainability risks. Sustainability risks are defined by the EU’s Sustainable Finance Disclosure Regulation (2019/2088) as “an environmental, social or governance event or condition that, if it occurs, could cause a negative material impact on the value of the investment”. For further information on our sustainability risk management approach please visit [www.ubp.com]

Reasonable efforts have been made to ensure that the content of this document is based on objective information and data obtained from reliable sources. However, UBP cannot guarantee that the information the Bank has gathered in good faith is accurate and complete, nor does it accept any liability for any loss or damage resulting from its use. Circumstances may change and affect the data collected and the opinions expressed at the time of publication. Therefore information contained herein is subject to change at any time without prior notice. UBP makes no representations, provides no warranty and gives no undertaking, express or implied, regarding any of the information, projections or opinions contained herein nor does it accept any liability whatsoever for any errors, omissions or misstatements in the document. UBP does not undertake to update this document or to correct any inaccuracies which may have become apparent after its publication. This document may refer to the past performance of financial instruments. Past performance is not a guide to current or future results. The value of financial instruments can fall as well as rise. All statements in this document, other than statements of past performance and historical fact, are “forward-looking statements”. Forward-looking statements do not guarantee future performances. The financial projections included in this document do not represent forecasts or budgets, but are purely illustrative examples based on a series of current expectations and assumptions which may not happen as forecast. The actual performance, results, market value and prospects of a financial instrument may differ materially from those expressed or implied by the forwardlooking statements in this document. The projected or targeted returns are inherently subject to significant economic, market and other uncertainties that may adversely affect performance. UBP also disclaims any obligation to update forward-looking statements, as a result of new information, future events or otherwise. Any performance data included in this document does not take into account fees, commissions, expenses charged on issuance and redemption of securities, or any other costs,

nor any taxes that may be levied. The tax treatment of any investment depends on the client’s individual circumstances and may be subject to change in the future. This document does not contain any tax advice issued by UBP and does not reflect the client’s individual circumstances. This document is confidential and is intended to be used only by the person to whom it was delivered. This document may not be reproduced, either in whole or in part. UBP specifically prohibits the redistribution of this document, in whole or in part, without its written permission and accepts no liability whatsoever for the actions of third parties in this respect. This document is not intended for distribution in the US and/or to US Persons or in jurisdictions where its distribution by UBP would be restricted.

**Switzerland:** UBP is authorised and regulated in Switzerland by the Swiss Financial Market Supervisory Authority (FINMA).

**UK:** UBP is authorised in the United Kingdom by the Prudential Regulation Authority, and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the Prudential Regulation Authority.

**Dubai:** This marketing material has been communicated by Union Bancaire Privée (Middle East) Limited, a company regulated by the Dubai Financial Services Authority (“DFSA”). It is intended for professional clients and/or market counterparties only and no other person should act upon it. The financial products or services to which this material relates will only be made available to a client who meets the professional client and/or market counterparty requirements. This information is provided for information purposes only. It is not to be construed as an offer to buy or sell, or a solicitation for an offer to buy or sell any financial instruments, or to participate in any particular trading strategy in any jurisdiction.

**Hong Kong:** UBP is a licensed bank regulated by the Hong Kong Monetary Authority (HKMA) and a registered institution regulated by the Securities and Futures Commission (SFC) for Type 1, 4 & 9 activities only in Hong Kong. The securities may only be offered or sold in Hong Kong by means of documents that (i) are addressed to “professional investors” within the meaning of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) and any rules made thereunder (the “SFO”); or (ii) are defined as “prospectuses” within the meaning of the Companies Ordinance (Chapter 32 of the Laws of Hong Kong) (the “CO”) or constitute offers to the public within the meaning of the CO. Unless permitted to do so under the laws of Hong Kong, no person may issue or have in their possession for the purpose of issuing, whether in Hong Kong or elsewhere, any advertisement, invitation or document relating to the securities, directed at, or likely to be accessed or read by, the public in Hong Kong, except where the securities are intended to be disposed of only to persons outside Hong Kong, or only to “professional investors” within the meaning of the SFO.

**Singapore:** UBP is a bank regulated by the Monetary Authority of Singapore (MAS), is an exempt financial adviser under the Financial Advisers Act 2001 of Singapore to provide certain financial advisory services, and is exempt under section 99(1) of the Securities and Futures Act 2001 of Singapore to conduct certain regulated activities. This document has not been registered as a prospectus with the MAS. Accordingly, this document and any other document or material in connection with generic recommendations may not be circulated or distributed, whether directly or indirectly, to persons in Singapore other than (i) institutional investors; or (ii) accredited investors as defined under the Securities and Futures Act 2001 of Singapore. This advertisement has not been reviewed by the Monetary Authority of Singapore.

**Luxembourg:** UBP is registered by the Luxembourg supervisory authority the Commission de Surveillance du Secteur Financier (CSSF).

**Italy:** Union Bancaire Privée (Europe) S.A., Succursale di Milano, operates in Italy in accordance with the European passport – held by its parent company, Union Bancaire Privée (Europe) S.A. – which is valid across the entire European Union. The branch is therefore authorised to provide services and conduct business for which its parent company, Union Bancaire Privée (Europe) S.A., has been authorised in Luxembourg, where it is regulated by the Luxembourg financial supervisory authority, the Commission de Surveillance du Secteur Financier (CSSF).

**Monaco:** This document is not intended to constitute a public offering or a comparable solicitation under the Principality of Monaco’s laws, but might be made available for information purposes to clients of Union Bancaire Privée, UBP SA, Monaco Branch, a regulated bank under the supervision of the Autorité de Contrôle Prudentiel et de Résolution (ACPR) for banking activities and under the supervision of the Commission de Contrôle des Activités Financières for financial activities.

**Jersey:** Union Bancaire Privée, UBP SA, Jersey Branch is regulated by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Union Bancaire Privée, UBP SA, Jersey Branch is a branch of Union Bancaire Privée, UBP SA, whose registered offices are at Rue du Rhône 96-98, P.O. Box 1320, 1211 Geneva 1, Switzerland, with its principal place of business in Jersey at 3 rd Floor, Lime Grove House, P.O. Box 526, St Helier, Jersey JE4 5UH.

**Portugal:** Union Bancaire Privée (Europe) S.A. Sucursal em Portugal is regulated by the Securities Market Commission (CMVM) and duly authorised by Banco de Portugal.

**South Africa:** UBP Investment Services (Pty) Ltd is an authorised financial services provider (FSP number 53152) in terms of section 8 of the Financial Advisory and Intermediary Services Act, 2002 (Act No. 37 of 2002) and conducts its activity under the supervision of the Financial Sector Conduct Authority.
